

ISO/IEC 27001:2022 Certification Summary -- Cloudy SaaS Inc

Cloudy SaaS Inc maintains an Information Security Management System (ISMS) certified against ISO/IEC 27001:2022. This summary is provided in lieu of the full Statement of Applicability for vendor due-diligence purposes.

A.9.2.1 (User access management): We enforce multi-factor authentication for all employee access to production systems, without exception. MFA is required at both the VPN and SSO layer before any engineer can reach a production credential.

A.12.4.1 (Event logging): Production audit logs are retained for 30 days in hot storage before rolling off to cold archive.

A.16.1.5 (Response to information security incidents): Continuous monitoring is in place across production infrastructure via a centralized SIEM, with on-call paging for anomalies. Monitoring coverage has recently trended down and is under active remediation.

Certificate is issued by an accredited certification body and is subject to annual surveillance audits and a three-year recertification cycle.
